EDUCATION

Montclair State University
Bachelor of Science in Computer Science

Montclair, NJ
May 2026

PROJECTS

Beacon – AI-Powered Client Portal SaaS | *React, Vite, Node.js, PostgreSQL* April 2026 – Present

- Built a full-stack SaaS platform that enables agencies and freelancers to manage client communication, project deliverables, approvals, and shared files through a centralized workspace.
- Developed authenticated dashboards, project management workflows, invite-based collaboration, and multi-client workspace functionality.
- Designed and implemented a PostgreSQL/Supabase relational database to support client portals, project tracking, invitations, activity logs, and persistent application data.
- Integrated AI-powered inbox triage capabilities and Outlook connectivity to identify high-priority requests and improve client communication workflows.

Flagship – Feature Flag Management Platform | *Python, MySQL, React* April 2026 – Present

- Built a full-stack platform for feature flag and release management, enabling engineering teams to control feature rollouts and reduce deployment risk.
- Developed an interactive dashboard for managing projects, feature flags, rollout configurations, and environment-specific settings.
- Implemented backend API endpoints for project management, user onboarding, waitlist functionality, and feature configuration workflows.
- Designed support for staged rollouts, environment-specific controls, and production kill-switch functionality to improve release safety.

Personal Website | *React, JavaScript, HTML, CSS, Firebase* Sep 2025 – Present

- Designed and developed a responsive portfolio website to showcase technical projects, skills, and professional experience.
- Built reusable React components and responsive user interfaces to improve maintainability and user experience across desktop and mobile devices.
- Utilized Git and GitHub for version control, project management, and continuous iteration throughout development.

RELEVANT COURSEWORK

Software Engineering, Computer Security, Data Science & Statistics, Operating Systems, Computer Networks

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Frontend: React, HTML, CSS

Backend: Node.js, REST APIs

Databases: PostgreSQL, MySQL, Firebase

Developer Tools: Git, GitHub, Docker, VS Code

Concepts: API Integration, Authentication, Database Design, SaaS Development
